

[Daví for President 2024]

Press Release

June 17<sup>th</sup> , 2024

### The Declaration of American Human Governance:

#### Why You Should Be a Part of the Rising Coalition to Preserve Democracy in 2024

*With over going 99% of the popular vote to one candidate, has The Green Party publicly rigged their presidential primary?*

*And if so, as the only non-corporate national political party, what does this mean for democracy in America?*

On the [Green Party 2024 presidential candidate page](#) there are 6 listed presidential candidates. With over [99% of the popular vote](#) currently going to one candidate, regardless of why that candidate was the only one allowed on the ballots of states with the largest number of delegates (such as California and Maine), regardless of why the advertised presidential candidates in New Mexico, Ohio, Oregon, and Pennsylvania were not the same candidates on the ballot, what we are left with is the only non-corporate national party in America portraying itself to have no diversity of thought or opinion.

Perhaps The Green Party's best-kept secret is a presidential candidate named [Daví](#) who has been running since June 2023 and seemingly over-exemplifies the party's earthy and humanistic principles. The self-described Avatar of Earth, is presenting the first-ever presidential plan for equality and democracy via what he refers to as Earth Order: direct democracy with a digital voting system, coverage of all healthcare costs, a housing exchange ending homelessness, finding harmony between usage and contribution to Earth. While being the youngest, Daví (37), is the lone 2024 presidential candidate who is still in the race and not supporting mandates, big pharma, big tech and/or war which reflects most Americans' current perspective - the most important perspective in this election.

As proven in court by the Democratic Party in 2020, corporations such as the Democratic, Republican and Libertarian Parties are only beholden to their own corporate goals and not the American people. The Green Party as the only non-corporate national political party has now ostensibly sacrificed their role as the last

beacon for a potential fair election. Nonetheless, we in America have a democracy to maintain.

In a coalition named Human First: America, Daví's team as well as a number of organizations in and outside of the Green Party including [Green Renaissance-Sovereign Rights Movement \(National\)](#), [Green Liberty \(Oregon\)](#), presidential candidate, Emanuel Pastreich and others, have come together to announce [The Declaration of American Human Governance](#).

The Declaration of American Human Governance states that American government must respect Americans as humans first, before any other rules, corporations or so-called "artificial intelligence". This document (written by Daví) declares American Human Governance over our American Government, taking action to ensure the accurate reflection of Americans' will in America's government, introducing a 4<sup>th</sup> branch of government based on digital popular vote.

Starting on America's Day of Freedom, July 4th and continuing to November 4th, 2024, if you as a natural-born or Green Card-holding citizen above the age of 18 would like to officially sign The Declaration of American Human Governance and vote for President in a digital 2024 popular vote, you can!

It's time to take the reins of our nation and stop being spectators, the declaration allows us to do just that in a peaceful, organized, non-violent way. In contrast to the ever-growing dissatisfaction with American elections, looming war, campus protests, convicted criminals in and out of office, The Declaration of Human Governance frees each individual to make their own decision and be heard, resulting in a true, collective, American voice in 2024.

Following in the legacy of Thomas Jefferson and America's founding fathers, this is the moment to define a new chapter of who we are as a nation.
