DAVÍ FOR PRESIDENT

AMERICA · 2024

bydavi.com

PRESS RELEASE

July 19th, 2023

NYC ARTIST, DAVÍ, CLAIMING TO BE ÄVATAR OF EARTH SEEKS THE GREEN PARTY'S PRESIDENTIAL NOMINATION

Music artist, choreographer, tech founder, 2021 candidate for New York City Mayor and Ävatar of Earth, Daví (pronounced "dah-vee") seeks the Green Party's presidential ticket.

Daví's platform calls for The American Refresh: a 4-year transition period of what we know as the American federal government, between 2025 and 2028. During this time his platform states, "the American government will have the chance to apologize for its mistreating of the American people and through paced collective voting," revote to a new agreement for American government.

At the core of the campaign, overseeing the refresh, is an agreed-to system of equality for humanity in alignment with Earth called Earth Order.

Daví states, "Anything is possible with awareness. As possibly the only serious presidential candidate who is not working for the status-quo, the powers-that-be, committed to war and trauma, this campaign is not only exciting, empowering and beautiful, in a moment of great social and economic strife, this campaign is imperative. Join us in our goal of earning 80% of the American popular vote in the November 2024 national election. I am asking for your trust to lead, so that we can lead the future, together."

Daví's publicly-shared campaign plan (at bydavi.com) includes a 'musical debate tour' for he and the other Green Party candidate(s), as well as, the "Lifeboat Party Series"; a traveling musical experience running parallel to the debate tour for those who like to interact outside of normal political circles.

Playing in the background of the website is the "America Together (Intro)". The intro is the opening to Daví's submission for the new American Anthem which will be released on August 1st 2023. Buckle up everyone, it's gonna be a great ride!

THE ÄVATAR DAVÍ CAMPAIGN
BYDAVI.COM

ABOUT DAVÍ

I was born in Hartford, Connecticut, August 9th, 1986, and named DeShaun Davis. My parents were split, and I was raised between Connecticut, Virginia and New York City. After graduating New York University, I've called NYC home ever since; currently living in The Bronx. Using what I understand as my spirit's name, Daví, my adult life as a music artist, choreographer (working with Kerry Washington, Melvin Van Peebles, and Ashanti), grassroots organizer (former NYC leadership of the Malcolm X Grassroots Movement), public school arts teacher and tech founder (of a blockchain-based company for

music royalty payment oversight housed in NYC and Paris) dramatically shifted like many in 2020.

During this time of pandemic, there was a lot of quiet and time for internal reflection and because of that, many people throughout the world reported feeling an internal spiritual elevation process, as did I. I was compelled to confront my fears, my relationship with Earth that I'd silently nurtured since my childhood dramatically deepened and I began intuiting, writing 6 volumes of truths about the current human condition and contrasting words needed to self-discover sacred purpose within this matrix, (and still writing.) This culminated into an understanding of myself as Ävatar of Earth, committing my life to the upliftment of humanity and Earth. You can visit my website bydavi.com for my full bio, videos and the first volume free to download.

2021 CAMPAIGN FOR MAYOR OF NYC

Inspired by this elevation, in an effort to be responsible for a healthier environment for myself and beloved New York City - the spiritual heart of the nation and the planet, I ran for Mayor. In my campaign, I presented the first-ever system of human equality by a political candidacy, Earth Order.

EARTH ORDER

Capitalism, with its artificial motto - “make more _____” with no direct connection to the well-being of the human or Earth will naturally continue to implode as the limits of its functionality within a living world are revealed. This game of capitalism, it has no purpose other than to be on - to be played and feed itself.

It's just like when playing Monopoly, a game that started with many players is down to the last two and it's been 4 hours but instead of ending the game, to do something better for everyone, the two players just keep nitpicking each other with rent; meanwhile, everyone else is just watching, living off the scraps of those players' fortunes, quietly hoping for some great change.

Humanity requires a great change, a new “game”, a new productive social system to play that integrates the health of humanity and Earth; a system that inherently includes refreshment and growth as core tenets, just like the seasons of Earth.

Earth Order is the sacred high protector of humanity and Earth. The Earth Order organization is the centering of the growing definition of how humanity defines equality and evolution in care and in good shepherding of our evolving Earth.

As we move into a time of unprecedented inequality across the planet and at the same time becoming more aware of the existence of other species in the universe and amongst us here in Earth, the need to define who we are and how we treat each other is ever-most present for the protection, survival, thrival and evolution of humanity.

With Earth Order, the goal is to have humans agree to 12 points and 3 principles so that we may lead ourselves and grow in alignment with Earth, truth and the true potential of our lives.

A vision given to and guided by Ävatar Daví, Earth Order offers a new perspective of how society can work in cooperation; support for each to work within their unique interests and passions; allowing the greater humanity to responsibly find harmony and balance between usage and contribution to Earth.

WHAT DOES EARTH ORDER DO?

Earth Order provides equal salaries for chosen work. Participants can either create their own business and apply to Earth Order or work for a pre-existing Earth Order Business. Salaries are paid in digital currency and personal accounts are encrypted for privacy.

Earth Order offers a home exchange where all have access to quality housing. Participants will be able to live in homes that are managed and maintained by Earth Order and have the opportunity to transfer locations seasonally.

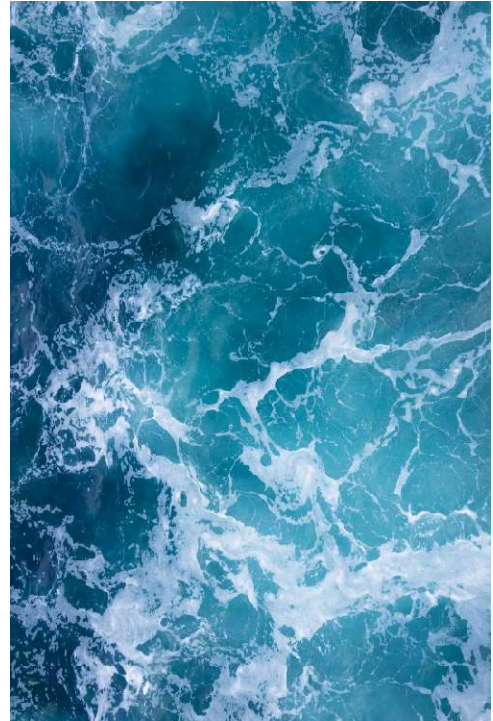

Earth Order covers all healthcare costs.

Earth Order provides a voting system where everyone votes on everything. Based on the voter's registration number, voting is done via website and via an app (that respects voter's digital privacy).

Voting periods last for 4 months with information about the topics directly on the site. All votes are logged in blockchain with a signature confirming the vote.

Annually, Earth Order Businesses contribute a percentage of profits to the national Earth Order organization and Earth Order pays the salaries of the businesses' employees and provides grants for new projects. This creates a network economy that is cyclically refreshed and hive-like in that all businesses are strengthening each other, while competing to provide the best working environment for those who choose to work in the business. Through collective power, Earth Order creates a new pathway, through which small businesses and new ideas have a chance to grow in a world of monopolies.

More details about Earth Order can be viewed at bydavi.com.

AN EXTRAORDINARY CANDIDATE

During my mayoral candidacy, I was dramatically censored by the media and other institutions such as Columbia University, local television stations and The New York Times (who posted every single Mayoral candidate who registered to run except me).

Despite raising \$0 for my city campaign fund as a stand to avoid contributing to a corrupt election ring and getting onto publicly accessible television only 2 times, I was honored to turn on the evening news and see that I still received over 1000 votes as a write-in independent candidate, (and maybe more - the actual number was probably higher as there were over 30,000 votes that were reported by the election board as "Unrecorded".. and yes you read that right).

Nonetheless, my investment-to-vote ratio was higher not only than most in that mayoral race but most political candidates

generally, showing that my message inspires people in a unique and extraordinary way; imagine if I had backing from a political party...

THE CAMPAIGN PLAN

THE AMERICAN REFRESH

In my platform, I call for The American Refresh: a 4-year transition of what we know as the American federal government after my 2025 Inauguration, until 2028.

DURING THE AMERICAN REFRESH WE WILL:

- Realize human equality within America.
- Unlock the keys to free energy nationwide.
- Turn America into a high recycling nation.
- Require medical systems to offer both western and natural holistic options to address health concerns.
- Address the systematic failures of the government.
- Find new and better directions through paced collective voting.

WHY DO WE NEED THIS TRANSITION?

As a nation, we need this moment of assessment and pause so that the American government can **apologize for continually prioritizing the short-term profits of greedy individuals and their corporations over what is best for the American people.**

A moment, so that the American government can **apologize for experimenting on Americans with inadequately tested shots** that have caused millions of social divisions, psychological traumas, adverse reactions and sudden deaths.

A moment, so that the American government can **apologize for the countless wars killing millions of innocent people, ultimately benefiting warmongers** and corporations over the American people generation after generation.

A moment, so that the American government can **apologize for the allowance of harmful chemicals in America's public food, air and waters.**

A moment, so that the American government can **apologize for invading the digital privacy of American people.**

A moment, so that the American government can **apologize for hiding critical information about free energy, our history and our place in the universe.**

A moment, so that the American government can **reshape into what it needs to be so that it operates with integrity to the will of American citizens.**

A moment, so that by 2028, we, the American voters and previous non-voters, can **get to a point as a nation where we accept our responsibility for allowing our government, our militaries and our corporations to wreak havoc on other nations** in the name of “free market capitalism” and “spreading democracy”.

A moment, so that we **can find a starting place of where we can all feel proud of our nation.**

THE PROCESS

Under emergency authority, the capital of America will return to its original location, New York City, where Earth Order’s headquarters is located. (The District of Columbia will undergo thorough review during this time.)

As the human spiritual nexus of the world, New York City will become an American city-state, distinguishing the spiritual nexus west of the Atlantic, in balance with the spiritual nexus east of the Atlantic - Vatican City. The boroughs will evolve into separate cities with separate mayors all under the direct guidance of Earth Order.

Earth Order will be recognized by America as the sacred high protector of humanity and Earth in which all global organizations of economics, nation-state and/or finance are secondary to. Earth Order oversees the decent treatment of any human and the agreement to what humanitarian behavior is, before any other law or contract.

All American federal government operations will be under the direction of Earth Order: America, the branch of Earth Order specifically concerned with America until 2028 when Americans vote to finalize the next chapter of what is wanted for the organization of American government.

In Earth Order: America, the core tenets will be focused on humanity, all American people will be protected and have the option to opt-out of capitalism and enroll in Earth Order; ending human trafficking, ending usury (interest, student loans and taxes), ending chemtrails and ending any non-organic farming within public food commerce, (supporting farmers in their transition to organic) and requiring non-organic labeling until 2026.

LEADERSHIP OF EARTH ORDER: AMERICA

The leadership of Earth Order: America will be organized into 4 areas:

PHYSICAL

- Rehabilitation and development of schools, bridges, roads, railroads, water channels, sewer systems and public transit; purification of rivers; expansion of wild forestry for the health of the land and the protection of native animals.

MENTAL

- Development of a humanitarian education system – Lifesity, the pre-university preparation for life; development of internet, music streaming and digital content systems, supporting historical archives, libraries and museums; regularly measuring life-satisfaction statistics from citizens.

EMOTIONAL

- Emotional and social supports for Americans healing post-pandemic; normalizing physical health and well-being activities and offerings; assessing the criminal justice system and expanding rehabilitation centers for those who've committed crimes.

SPIRITUAL

- Concerning the spirit of America – How are Americans supported and inspired by their environment and the governmental foundation? How are the actions of America aligned with the optimal health, growth and evolution of Earth?

THE EMERGENCE OF AN EVOLVING AMERICA

A new America will continue its imperialism only symbolically; becoming a shining light towards a brighter future as we shift into a more cooperative, motivating and evolving America with finesse. A chance to return to the natural order, Natural Law via Earth Order.

With Earth Order and The American Refresh, we are given a chance to acknowledge each other as human, as Americans in this together. With that as a basis we are able to confront the pain and damage done by the previous governments, breathe and then take the time to collectively choose who we are as a nation moving forward.

PLAN FOR NATIONAL VISIBILITY AND FUNDRAISING

Political TV is uninspiring. Historically, political television has only motivated an average of about 50–60% of Americans to vote per national election cycle. Americans don't want to watch endless interviews and press conferences with random interviewers about abstract and foreign topics. They want growing conversations rather than static talking points, said at different times, about topics that are important to their living.

Americans want to see carnage, gore, skill and wit, intellectual warfare, a fight for their vote; a test for the onslaught of conversations and decisions that the president needs to be able to manage each day of the term.

INITIAL VIDEO CONTENT

In the autumn of 2023, I will release musical video content that will describe my platform in detail, housed on my website (bydavi.com), developing interest around the platform for voters.

THE GREEN PARTY PRESIDENTIAL DEBATE TOUR

Starting at the beginning of 2024, the Green Party presidential candidates will have livestreamed town hall-style debates, touring each of the states including Puerto Rico. The audience in the venue and (online) in the state will be able to take a digital poll online voting on which topics they would like to see discussed. There are some musical elements to this as well which I can detail more in-person.

Starting the tour at the beginning of the year will allow for a slow and gradual grassroots build throughout 2024.

The focus of the tour is not to convince an outdated electoral college and politics-as-usual; this campaign is a play to engage the other half of the American population who have been dormant and unengaged in the political process; a play to be more popular and aligned with the hopes and aspirations of the core majority of America, in the way they like to be engaged – through some form of quality entertainment with high humanitarian thinking and music.

- Reinstilling the truth as a basis of the national conversation.
- Reinstilling the respect and honor of being chosen to be the leader of the free world.

This will be a powerful voter-registration drive and a declaration of a serious change to the American public intimately in each state.

Having a formidable third-party candidate in the national presidential race who is known because of an ongoing grassroots movement, will split the vote, reducing the overall amount required to win the popular vote, allowing the blue phoenix of truth, justice and light to rise in the national election; so that America and the free world of humanity may thrive and evolve!

THE LIFEBOAT PARTY SERIES

The Lifeboat Party Series; a traveling musical experience running parallel to the musical debate tour for those who like to interact outside of normal political circles. More details to come.

KEY TOPICS

ON IMMIGRATION

Immigration is a complex issue with many aspects to consider in reaction to the current problems and border-overwhelm. Most importantly, most people are coming from countries that the United States of America's previous governments have had a direct hand in systematically disenfranchising through military and greedy corporate drug, oil, land and animal operations.

Proactively however, I believe it is important to use this opportunity to not only support recent immigrants' transition and matriculation into the American workforce, but if indeed they do want to return to their families in their home-countries, Earth Order can be used to directly support their employment in their home-country by supporting organic farming and reforestation projects that agree to hire those returning throughout the Caribbean, South and Central America.

ON TECHNOLOGY

Earth Order: America will conduct a vote to institute urgent technology standards such as standards concerning artificial intelligence; a.i. is a tool and is to be treated as such, all tools should always be subservient to any human will, never possibly interrupting the path of any human in any way, without obvious, explicit and evidentiary permission. Ultimately, just like capitalism, this a.i. tool, this game, it has no purpose other than to be on – for its programs to be played and to feed itself, so the careful management of this technology is vital in its beginnings.

The years during the pause will be used to develop privacy-ensured, low-radiation national wifi, internet and a social career platform. The social career platform is primarily for career connections within Earth Order Businesses.

We will reduce and limit 5G towers and their harmful effects on the human body. We will install traffic-sensitive stoplights for reduced city-traffic.

We will no longer allow the whims of corporations to decide our online or physical abilities.

ON POLICE

The current national police state utilizes a one-size-fits-all approach to any emergency – guns, batons and handcuffs in response to any and every possible emergency. There are many shortcomings within the training and infrastructure of the police nonetheless, it is the best we have now and we stand in gratitude to those within the police force who bear the less-seen emotional brunt of dealing with the outliers and crazy experiences of our society on a daily basis.

The goal with this platform is not to reduce the police but rather, to add a second layer of cushion to the management of an emergency. A large majority of domestic emergencies, though they may escalate when police arrive, are often the result of not having another voice to mediate the problem in a productive direction. The public needs an **Emergency Mediator Wing** that will be able to mediate tough situations and conversations on-demand.

Mediators will be armed with tools for effective communication and goal-oriented conversation steering, as well as resources and community activities that may be of use. Should there be a need for backup, a police officer will be readily nearby.

With the possibility of an extra cushion for relationships, the Emergency Mediator Wing will be the cushion needed for American society that is sensitive to what it means to be a melting pot; navigating the tensions caused by intersecting familial, religious and cultural differences in public and private spaces. With this, lies the possibility of saving unnecessary breaks of businesses, friendships, marriages and families.

HOW DOES THE EMERGENCY MEDIATOR WING WORK?

When someone calls 911, they can either request:

- 1) Emergency Rescue and Assistance - which uses normal police protocols, or
- 2) Dispute Mediation - in this case, the 911 dispatcher will send 3 Mediators to the location with an armed police officer who waits in the car. The Mediators listen to all parties, recess and then issue determinations and suggestions (such as community service, rehabilitation, restraining orders, money owed, etc.)

This process gives the citizen the opportunity to decide how they want to be helped rather than being forced to interact with a threat of violence or imprisonment; parties involved will have the option to choose if the mediation can result in criminal charges or not. It also reduces input into the already-congested judicial system, ultimately allowing people to move forward from difficult experiences faster.

ON FOREIGN POLICY

My stance on foreign policy is that we need to get our internal policy together before we have a foreign policy. I have no interest in continuing the duopoly's nasty plots in foreign affairs. This campaign reflects the average American's opinion that has never supported war, in all cases, in all foreign wars, current and past. We pay billions for the most elite, technologically-savvy military in the world, yet still don't have secure land or air borders; this is not a reflection of the equipment not-being available but rather a reflection of the military's attention being too scattered around the world.

I will meet with all military generals of each of the American military occupations to discuss the needs for a peaceful return home of all military personnel outside of American embassies. The priority of America's military will return home - securing the borders, ensuring due process of incoming immigrants and America's safety.

Establishing order in America's perimeters and infrastructure so that America can start minding our business and feeling safe, focus inward and collectively heal.

WHY IS DAVÍ SEEKING PRESIDENTIAL CANDIDACY?

I'm running because I'm not impressed with the vision of any candidate, of any party in the upcoming presidential race. I'm running because in this critical moment of ugly intentional crimes against humanity perpetuated by the individuals sitting in the trusted seats of government; in this time of deep sadness, despair and repressed anger; if I know better, I must offer better or I am just hoarding the fruits of my life, intuitions and experiences; for in all cases, there is no reason for me to complain about someone else, if I am not doing all I can to address the issue.

I am not and have never been a rich man via money, my priority has been different. Even as a 9-year-old boy pretending to be The Wiz, performing songs from the musical for my babysitter while jumping down stairs with my cape – a green blanket floating behind me, my priority in life has always been to have enough for myself to be comfortable, then figure out how I specifically, can support the world getting better. I used to think about how The Wiz made Oz so magnificent.

My goal with entering this race is to refocus what a presidential campaign should be: a competition to see whose vision is best for the future of America and the free world. In this, I and the other Green Party candidates will be unified. Focusing not on the other parties and their personal stuff but simply presenting options, presenting a competition in a virtual coliseum (as all debates are livestreamed) so that America is able to understand the breadth and details of the campaigns' visions.

As there is a current threat of carelessly-created artificial intelligence harming the social fabric of humanity, it is critical to regroup the leadership of the nation in truth, in humanity and in Earth.

I understand the purpose of my life to be an optimizing vessel of human alignment with Earth, whose weapon / skill is artistry – (music, strategy, choreography, writing, performance, technological invention and more). Regardless of who we are or what our particular skills are, if our humanity is under attack, we must be ready to best utilize our weapons, our exact personal skill sets to best-contribute to the collective.

At the intersection of what I know and what I can do, this is how I can best-contribute now.

WHY DID DAVÍ CHOOSE THE GREEN PARTY?

The Green Party has been a powerful stand for change for over 38 years, slowly gaining more and more momentum with each election cycle; successfully achieving mostly-national balloting, allowing the possibility for another way outside of the purple (the red and blue mix), being a stand for another possibility, decade after decade.

I was personally most-heavily involved with The Green Party while supporting the publicity of the 2008 presidential campaign of Cynthia McKinney and Rosa Clemente (whom I worked alongside in the Malcolm X Grassroots Movement), both intellectual and political sheroes of mine who I've thankfully kept in touch with over the years. (In January of this year, Cynthia McKinney called Earth Order "very innovative!") During their campaign then, I found myself overwhelmingly grateful to the Green Party's platform for allowing alternative political thought on a national level, just as I am grateful now, in this critical time for America.

For me, the biggest way to honor The Green Party's work and vision making a way for the next generation, is to develop and present, as a representative of the next generation, an inspiring, winning presidential campaign plan, that reflects and expands upon the core principles of human dignity, environmentalism and democracy that The Green Party has been fighting for all these years.

Should this gift be accepted by the party with these instructions, there will be a Green Party-backed President of the United States of America.

WHY THE CHANGE TO EARTH ORDER: AMERICA?

Whether we like it or not, we live in a globalized society via technology and trade, so to fully address the problems with who we are, we must revert to the root of who we are on a global scale – we are human, we are in Earth. Once we are calm and feeling at peace with each other on the human level because we have recentered ourselves within the order of Earth, Earth Order, we are then able to see who we are as a nation, as citizens from a bird's-eye view, outside of the propaganda and coercions of the previous governments. From that higher perspective, we are then able to construct an internal identity and external relationships with other nations that we can be proud of.

This moment is really about whether we will allow ourselves to see ourselves; to see our own wants and needs; to accept who you are and be empathetic with any other human just doing what they think is their best from their perspective; to be truthful about the urgent situation of our world and ready to do what it takes to move forward.

(FOR VOLUNTEERS) HOW IS DAVÍ TO WORK WITH?

In terms of personal temperament, I'm direct and with that, I attempt to be as light and efficient as possible in communication so that I'm easy to work with. I have a clear vision so that the team's energy can be better-focused on micro-strategy (the details of how things will grow).

I've found myself to be a bit of a motivational coach for the people in my life, I can't help it, it's just an aspect of my personality. With that, I can be a bit tunnel-visioned at times so I will be keen to offer my best listening in this process and I ask for your patience with me as a novice in the national political realm.

HOW WILL DAVÍ DEAL WITH PUSHBACK?

Over the years I've found that most often to the public, I'm seen as the young, overly-optimistic, woo-woo spiritual and/or relatively unknown artsy artist, which is fine. So many underappreciate the creatives and the imaginatives while conveniently forgetting that everything that they experience in modern society was once imagined by someone who had enough spiritual foundation to try and create.

I'm not afraid, I'm not chasing attention, I'm just doing my best, and in the event that someone does watch or listen, there is the possibility of them understanding a new way that could be better for themselves and us all.

On the question of experience, the current president has more experience than anyone in American politics / government ever; considering where that "experience" has gotten the nation currently, perhaps experience in that way, isn't what's needed.

What matters is, do I feel prepared? The answer is yes. The meticulous and nuanced understanding of the current American plight and solutions, demonstrated in this very candidate statement authored with no other persons, shows my deep connection to Earth and the spirit of humanity. **I trust that I know what I know, and I can do what I can do, for a reason.**

I'm coming into the political race later and younger than anyone else currently, but everyone loves a good underdog story. My hope is simply to be heard and for the sake of America's future, that the best vision forward for America is able to rise to the top.

And ya never know, maybe America just suffers from a lack of hearing a young, fresh perspective.

CAMPAIGN GOAL

The goal of this presidential campaign is for [DAVI] to receive 80% of the American popular vote of 2024's national election. I will aim to receive the nomination of The Green Party but either way, I believe in the ability of the American public to write four letters in the Write-In Box which has been there the whole time.

All of this hopping and bopping to get an area on the ballot, when most people already know the name of who they want to be president. They may not know any other names of any other office, but they definitely know the name of who they want for President. We have a year together to get four letters right [DAVI].

SHADOW VOTE: THE ART PROJECT

There seems to be an ongoing issue with the management of paper ballots in each and every national election thus far. Considering my own experience with the thousands of “unrecorded” votes in the 2021 NYC mayoral election, as a leader my suggestion is to move forward into technology that we're fully aware is available, because there aren't missing numbers when it comes to anyone's bank account, right?

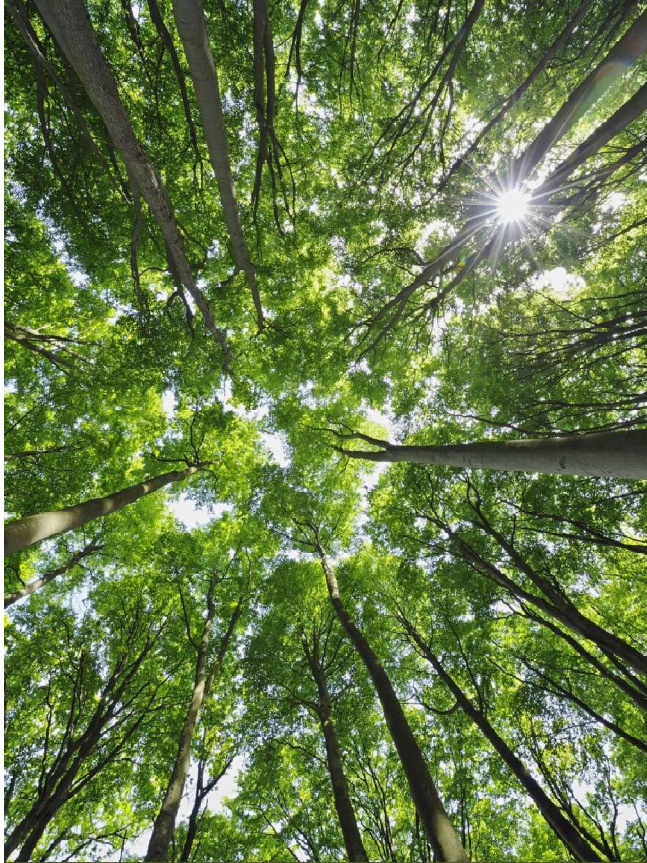

As a private citizen concerned about the integrity of the national elections, I will be commissioning a blockchain-based technology that will conduct a shadow vote utilizing the American voter's Voter ID# and 1 form of Photo ID. This technology will be publicly available online and the voting period will be open for 4 months so that the individual may move at their own pace in making their votes. Candidate-approved information will be available on the site for informed and intentional voting.

This is an effort that is in no way pretending to be federal, legal or legalized but rather a completely voluntary agreement to participate in an archive, a reference, a shadow, a picture of the American voice in 2024, a collage of faces and opinions by the people and for the people.

Should there be a need, in advance, all participants agree to have their vote made public to confirm validity.

This technology will be made available to all parties during their primaries (should the parties feel inclined) and finally during the national vote.

IN CONCLUSION

As hundreds of acres of forests are being intentionally burned in California and Canada; threat of a more-intense war ensues; new laws are being made to sexualize our precious children; new laws are being made to murder our invaluable bison and wild horses in the Midwest; as suicide, addiction and depression rates are at an all-time high, there is no time for me to not do my best for today and the future. I am honoring the opportunity I was given to participate in this nation with the best I have to give.

I am a healthy, single man with no children yet; unshakeable, unextortable and able to focus 100% of my working energy into the presidential campaign.

My platform is extreme and will serve as an outlier to visibly shift the focus of

the entire presidential race to where it should be - on the humans of America, which is part of Earth, our planet which requires good shepherding.

We've had too many presidents win by bad-mouthing each other, selling vague concepts of "hope" and "great"-ness with no real focus or commitments made on actual policy, resulting in the low-quality presidencies we've experienced during our lifetimes.

This platform is the possibility of another way where we can:

- Stop expecting misery and the least of these.
- Stop being victims of our circumstance and take charge of our course.
- Stop using more and more categorical, divisive language when the only description that the government needs to be attending to is the "American human".
- Heal from the trauma of the "pandemic".
- Help each other get out of cycles of pain and addiction and instead, start figuring out how to love life.

- Have a chance to breathe and accept the truth, then determine who we collectively want to be.
- Collectively have the opportunity for each of us to be seen and supported for exactly who we are.
- Choose a glorious future.

At the core, the leader should desire to leave the nation better than it was received; to allow the people and the land to grow up strong so that the children learn and do it better next time.

It is time for us to graduate into a nation of trust, innovation and growth. Where everyone is heard and where freedom of choice is simply understood – because in my acknowledging my freedom of choice, I must respect and honor your freedom of choice and do no harm.

America is crucial to the maintenance of free expression not only within the American family, but as the leader of the free world to all humanity, via our greatest export, culture.

Ultimately, this and any try at something is just a hunch, a thought experiment, following an intuition. What I've written above is the best presidential plan presented in this election cycle and the balm for the transition into a powerful American future. This platform is an easy transition for the individual as well, allowing those who would like to stay within the status-quo of the capitalism paradigm to do so, but allowing those who want to transition into a more-humanitarian, balanced system via Earth Order to do so, reflecting a general commitment to supporting freedom of choice.

I could be wrong and totally missing some key element that details why I might not be the right candidate for this critical moment; but by chance, if I am right and I am the right candidate, at the right time, with the right vision, to do the right thing... Oh what a glorious nation of peace, innovation and joy we will experience!

This is the moment that we choose whether or not to save the soul of our beautiful America. This is the moment when we, as a nation, must choose a path that we believe will stop our society's degradation and commit to its success or we will allow exactly what we fear. The obstacles within this journey should be expected and accepted fully with the knowing that beyond this transition is a new chapter of something better, something higher, something reflective of that which we know we can be.

This is the moment to interrupt the regularly scheduled program, to take the risk and do the extraordinary, to get the extraordinary result that we want, need and deserve.

For this reason, I ask to be heard. I ask for The Green Party of the United States of America to consider my presidential nomination in the 2024 primary and for my fellow Americans in the 2024 national election to vote **[DAVI]** for President of America.

I greatly appreciate your consideration and look forward to connecting with you over this next year.

Light,
